FGP Ceramic Liquid Ring Gas Pump

Horizontal liquid-ring gas pump for vacuum or compressor operation with aggressive gases and vapours. Armoured construction and adjustable impeller clearance.

Size range: DN 50-100

Compression reference: Up to 2 bar gauge; confirm selected configuration

Vacuum capability: Configuration-specific; confirm before selection

Materials: Technical ceramic; impeller material selected for medium

Shaft sealing: Packing or mechanical seals

Confirm achievable suction pressure for the gas composition, sealing liquid, temperature and selected pump configuration before ordering.
