FMA Ceramic Magnetic Drive Pump

Horizontal magnetic-drive ceramic pump for corrosive, hazardous or toxic liquids, with an armoured casing and hydrodynamic sleeve bearings.

Standard: DIN EN 22858 / ISO 2858

Size range: DN 32-50

Series flow envelope: Q < 85 m3/h

Series head envelope: H < 48 m

Materials: Thermal-shock-resistant ceramic; GGG 40.3 armour

Drive: Magnetic coupling

Series-level selection reference. The flow and head limits are separate envelopes, not a guaranteed duty point. Confirm current configuration, materials, motor and availability for the project.
