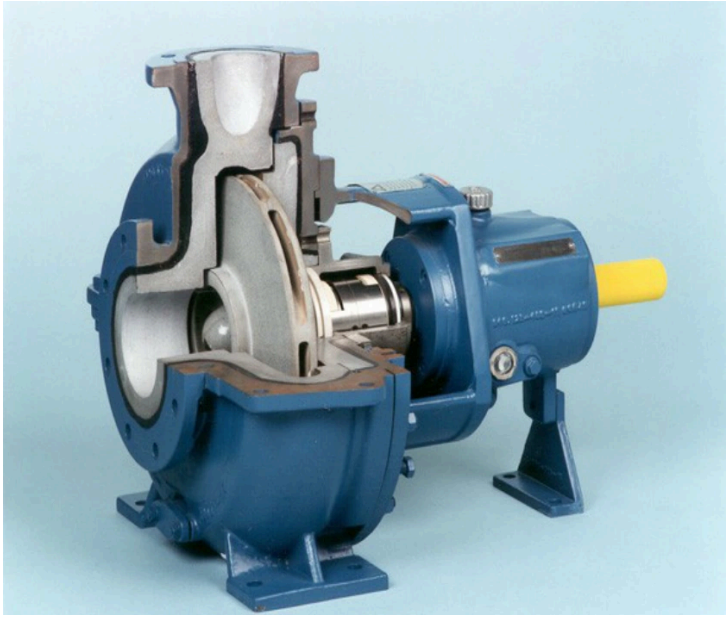
FNC Ceramic Chemical Pump

Horizontal armoured ceramic chemical pump for chemically aggressive and abrasive liquids. Closed impeller with an oil-lubricated bearing arrangement.



Standard: DIN EN 22858 / ISO 2858

Size range: DN 32-250

Series flow envelope: Q < 1500 m3/h

Series head envelope: H < 90 m

Materials: Technical silicate ceramic

Shaft sealing: Packing; single or double mechanical seals

Series-level selection reference. The flow and head limits are separate envelopes, not a guaranteed duty point. Confirm current configuration, materials, motor and availability for the project.
